Chillagoe - Early Days

A vast contrast to the Tropical Coast

Chillagoe - a historic Mining Town, rich in history.

On the 3rd September 1873 at Georgetown, North Queensland, a hand written notice was nailed to the bark wall of the Mining Warden's office

"J V Mulligan reports the discovery of payable gold on the Palmer River. Those interested may inspect at this office the 102 ounces he has brought back. "

The rush was on, and the pastoralists followed. The development of Far North Queensland had begun. Men from countries around the world toiled in an incredibly hot, hostile environment. Their mode of transport was basic. When work became scarce, or it was time to move on, they walked. Irvinebank to Chillagoe, Chillagoe to the Hodgkinson gold fields, or over the wild ranges to Mt Molloy.

Dad pushed a wheelbarrow in which were stacked all their belongings. A few pieces of iron, which would be used as shelter; maybe some hessian, a spade, a lantern, a few kitchen things and very little else. Mum and the children straggled behind, Mum, usually with a babe in arms. (Quote from old-timer Mr. Peel)

It is as a tribute to these pioneers, who trudged the dusty tracks, that this route has been named *The Wheelbarrow Way*. With little more than determination, they carved out a future and opened up the vast uncharted territory, just back o' Cairnsthe *Cairns Outback*.

Chillagoe, one hundred years ago hosted 13 hotels, two newspapers, a hospital and the population was over 10,000 people.

Today the history is evident throughout the town with numerous historic buildings and landmarks.

At Mungana the old township ruins stand tribute to the then hardworking men and women who came in search of prosperity from mining.
