Nature Navigators acknowledge Rainforest Aboriginal Peoples as the Traditional Custodians of the Wet Tropics and recognise their connection to this cultural landscape. We pay our respect to Elders past, present and future.

The Rainforest at Night

Enter the exciting world of the rainforest at night - when the forest awakens. Your guide is highly skilled in spotting the nocturnal animals and will provide interesting insights and help you to make the most of your experience. For a person interested in nature, the rainforest at night is something you need to experience at least once in your lifetime.

The Rainforest by Day

Learn about the processes that have shaped the environment, the extreme importance of this habitat and why it meets the UNESCO* World Heritage status. Experience the micro climate of the rainforest, the great variety of plant species. Take the chance to encounter some of the inhabitants like the Lumholtz' Tree Kangaroo, Platypus, Red Legged Pademelon, Jungle Carpet Python or Boyd's Forest Dragon along the way. Many of the animals here are found only in the Wet Tropics area. The highlands of the Wet Tropics is home to a host of bird species found nowhere else on the planet as well as the iconic Southern Cassowary.

UNESCO*, United Nations Educational, Scientific & Cultural Organization

The Rainforest Talks

An informative and entertaining 1 hour presentation to make the most of your experience in the rainforest of the Wet Tropics. It's origin, history and importance, including why it has World Heritage status, it's unique plant and animal inhabitants. Tips on how to be comfortable and confident in this environment, what to look for and what to look out for. Our aim is to prepare you for and enhance your experience of the rainforest of tropical North Queensland.
